DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-20 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "reference pixel position adjusting means for adjusting reference pixel positions such that the reference pixel positions match at the plurality of image display media, each of the reference pixel positions being determined by a reference top-plane side electrode, which is determined in advance from among the plurality of top-plane side electrodes, and a reference backplane side electrode, which is determined in advance from among the plurality of backplane side electrodes". In claim 17, "reference pixel position adjusting means for adjusting reference pixel positions such that the reference pixel positions match at the plurality of image display media, each of the reference pixel positions being determined by a reference row electrode, which is determined in advance from among the m row electrodes, and a reference column electrode, which is determined in advance from among the n column electrodes". The closest prior art, Takeshi et al. (JP 2001-242436) discloses a two-screen LCD wherein inversion is controlled to become reverse in both screens, however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
